

Creating a mind map

Follow these guidelines:

Highlight your ideas:

- Always put an image in the center to evoke the theme you are going to think about.
- Likewise, use images throughout your mind map, as well as colors and codes.
- Vary the size of the characters and the types of lines and images.

Use associations:

- Use arrows to establish connections.
- Use synesthesia, or free association of the senses.

Be clear:

- Write only one idea on each line.
- Start from the center and work outward.
- Arrange things in order of importance.

And above all, develop your own style!

- Do your own drawings.
